

# HOW MUCH MONEY do I need?

WWW.123HOMESCHOOL4ME.COM

## HAPPY TEACHING!

**PREPARATION:** Print these pages onto card, cut them to separate and laminate if you wish.

### TO PLAY:

- Let the children look through the priced cards and work out how much each item costs. If they have real or pretend money, count out the value of each item and place it on top of the cards.
- Look through the task cards and choose one. Find the related items and work out how much it will cost if the items are added together.
- Encourage this to be a mental math activity, just like it is at the shops... even rounding the numbers so they're approximately correct as you might when shopping. For eg, looking at  $\$1.10 + \$1.30$  and thinking 'it's around  $\$2.50$ .' Then, children can count out the correct money.
- Provide scrap paper and pencils for children to write down the prices if it helps.

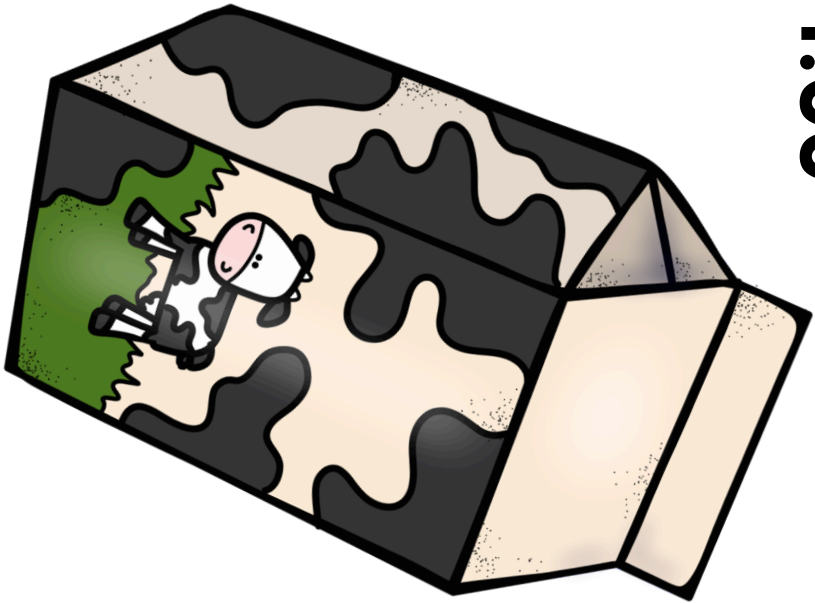

Please do not send this file to others, but direct them to 123Homeschool4Me where they can download it for themselves!

I hope your little ones enjoy this activity and wish you happy teaching and learning!

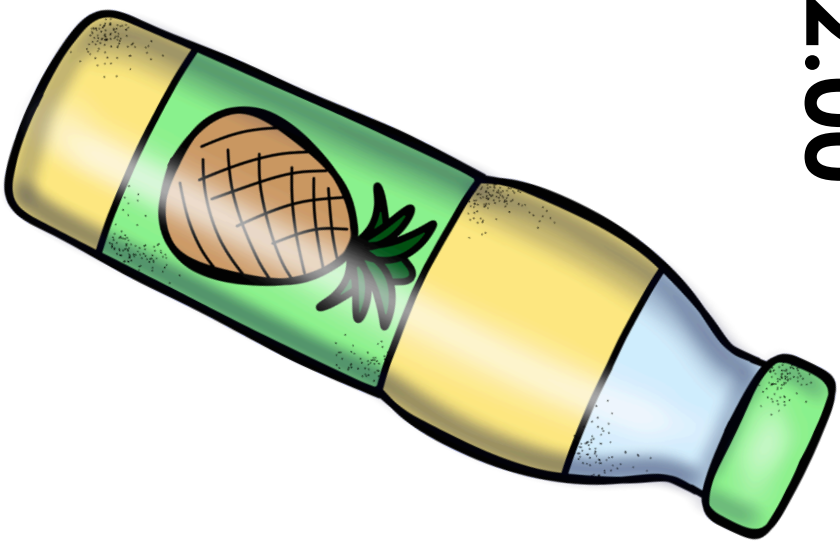

Liz
