

## Diseases that can Affect Organ Systems

DUE December 6, 2012

**Students will choose a system between: Cardiovascular (heart), Respiratory (Lungs) or Nervous (brain), Muscular (muscles),** The student will research a disease that has a negative impact on the entire system or an organ within that system. The student will create a trifold brochure (**Publisher preferred**) to educate the public about the disease. **Illustrations are required - (minimum of 4) - 25 pts. Information written in your own words- 45 pts) Neatness - 10 pts. Bibliography- 10 pts). Name - 10 pts.**

- What is the disease?
- What system does it affect?
- Is there any treatment?
- How does the disease of one system impact the rest of the body?
- What research is being done to prevent or cure the disease?
- How can a person with this disease receive support? Is there a national organization where patients can get assistance?
