

Mr. Lotz's 6-2 Science

Materials Needed for Class:

Agenda

Pen/Pencil

Composition Books

Daily Procedure:

1. Come in quietly and get your journals from shelf and sit down before the tardy bell rings.
2. Copy the question off the board and answer it in your science log, or complete the task on the board. If it is a Monday, copy the assignment information into your agenda first and then copy and answer the science log question or activity.
3. Wait quietly for class to begin.

Agendas:

Agendas should be brought to class every day. It is especially important that you bring them on Mondays. The first thing you will do every Monday is copy the assignment information from the board. If there is a homework assignment it will be written in red. You are to circle the homework assignment in your agenda.

Journals:

Your journal should be divided into 3 sections:

*Table of Contents

*Classwork: This is where you will put activities we do in class.

*Science Log: This is where you will copy and answer the question on the board each day. You will have a science log quiz at the end of each six weeks. You may only use your science log on the quiz. If you are absent, you are responsible for getting the question(s) you missed from me or another student.

Grading Policy:

There are two categories of grades work. They are minor summative Assessments, which are worth 40% of your grade. Major summative assessments and projects that are 60% of your grade. All assignments are expected to be turned in on the due date. If you are absent you are responsible for getting your make-up work. You will not be allowed to retest or redo any assignments until you have completed the required classwork and activities that you have not completed.

Reteach and Retest days are scheduled by appointment.
