OVERVIEW

One of the District's greatest concerns has been ensuring that all students have access to the digital tools and resources necessary to participate in classes whether in-person or remotely.

Each student now has access to their own District-issued Chromebook, creating a 1:1 environment for all students in Denton ISD.

We are excited to further empower our teachers and students in pursuit of our mission to create lifelong learners who impact their local and global community.

ACCEPTABLE USE POLICY

As part of the registration process, all families are provided with the **Acceptable Use Policy (AUP)** within the Student Code of Conduct. This video is a summary of the content in the Acceptable Use Policy.

INSURANCE FEE

In order to provide maintenance and support for Denton ISD-owned devices, Denton ISD will collect an annual, non-refundable fee of **\$20** for each device (\$10 for economically disadvantaged students).

This cost will cover support, maintenance, and accidental damage protection for up to a cumulative amount of \$200 for one or more repairs.

Opting Out

Students or parents/guardians may not opt out of the 1:1 program.

Each student will be assigned to and responsible for a Chromebook & charger, regardless of whether they choose to take it home or leave it at school. Information regarding the Chromebook Insurance fee will be sent by email at a later date to the student's primary guardian.

Chromebook Care

Internet Safety

Congress passed the Children's Internet Protection Act (CIPA) in 2000, tying E-rate program discounts to a school's Internet safety policy. The FCC requires three elements for compliance: content filtering to prevent access to obscene, pornographic, or harmful images; monitoring of online activities of minors; and education in appropriate online behavior and cyberbullying awareness.

To comply with CIPA, Denton ISD employs a variety of methods to manage the 1:1 program including Internet filtering, Classroom monitoring, Chromebook management, and application restrictions.

Internet Filtering and Classroom monitoring software collects information about the sites that students access. If a student attempts to access an inappropriate site, a firewall screen is generated and the filtering software blocks the viewing of that site.

Our Technology Division uses multiple management platforms for student Chromebook use and inventory control. Through these platforms, Technology staff can monitor use and manage application download controls.

TERMS OF AGREEMENT

Each student is required to comply at all times with the **Student Acceptable Use Policy** in the **Student Code of Conduct**. Any failure to comply may terminate the learner's rights of possession, effective immediately, and the District may repossess the property.

The student's right to use and possess the property terminates no later than the last day of enrollment in Denton ISD unless earlier terminated by the District.

Device Repair or Replacement Policy

If insured, the student and parent/guardian will NOT be charged for damages up to a cumulative amount of **\$200** for one or more repairs. [See this webpage for the estimated cost of repairs.](#)

Families who opt out of Chromebook insurance will be responsible for the full amount of repair and replacement fees. Part costs are determined by the device model. Final determination of applicable fees will be made by the Technology Division based on a student incident report.

Report any existing damage to the device to the student's teacher within **48 hours** of receipt. Basic wear and tear not related to intentional or negligence-related damage will not be assessed to the student.

LOST OR STOLEN DEVICES

Lost or stolen devices must be reported immediately to the campus and online.

This will allow the campus to quickly investigate and possibly recover the device. The District can disable the device remotely to protect the device and/or data on the device.

Stolen devices must be reported to the local police and a copy of the police report provided to the campus administrator within five (5) business days of the occurrence.
