

In Denton ISD, we are committed to providing the best possible instructional resources for learning. For our math and science students, we recommend the TI-84 Plus CE graphing calculator. This graphing calculator is an effective learning tool for students in middle and high school, and it will continue to be useful for students during college.

Benefits of the TI-84 Plus CE graphing calculator:

- Visualizing math concepts clearly with the color screen
- Connecting equations, data and graphing for stronger understanding
- Learning math and science on a tool designed specifically for learning without distractions
- Using the same tool for classroom and important exams
- Extending learning to coding with an easy-to-learn programming language
- Connecting to TI's microcontroller board, sensors, and programmable robotic vehicle for engineering projects

TI-84 Plus CE graphing calculator does not require access to the internet and is permitted for use on the following exams:

- |               |                         |
|---------------|-------------------------|
| ▪ SAT®        | ▪ AP®                   |
| ▪ ACT®        | ▪ IB® Diploma Programme |
| ▪ PSAT/NMSQT® | ▪ STAAR EOC Algebra I   |
