

Denton ISD

App Access Request Form

Purpose of form: There are many educational apps available on various platforms (iOS, android, etc..) that can be beneficial for teachers and students. Occasionally, district firewalls, filters, and/or other security software will not allow an app to communicate with the network. It may be possible to allow the app access to the district network by adjusting certain settings within our security software. This form is to be completed in the event that an app is not connecting to the network due to our security settings.

Directions: Complete and submit form to Barry Fox in the department of Instructional Technology

Please note: Non-free apps will not be purchased for testing purposes. The applicant can elect to deliver their device to the technology department with the non-free app preinstalled for testing purposes.

Applicant:

Campus/Title:

Phone number:

Date:

App title:

Developer:

Grade Level(s):

Subject area:

TEKS addressed by App:

When is the app appropriate to use according to the scope and sequence:

Type of app:

Assessment
