Classroom Video Guidelines

Teachers have the responsibility to preview and evaluate any video, film, or movie prior to use in the classroom or assigned for viewing outside the classroom. Teachers/librarians are strongly encouraged to use good sound judgment, extreme caution and appropriate decision making regarding the usage of any videos or on-line videos in any classroom setting. The age of the students should always be considered when making these decisions. Teachers should consider the value of the instructional time dedicated to viewing videos/films and should carefully relate the content of the video/film to the specified objectives of the class. The curriculum correlation must be demonstrated in the lesson plan. Teachers are encouraged to communicate to parents how videos relate to learning content. *No video, regardless of source, that is intended for "home use only" shall be shown to a class for entertainment purposes, reward, or time filler.* **Prior to showing any commercially produced video the teacher will notify the campus principal on the designated form outlining the purpose/instructional intent of the video intended to be shown. This requirement is in addition to the documentation required in the lesson plans.**

The motion picture rating system will serve as a minimum guide for age appropriateness of commercial videos/films. Video clips will be judged on the same basis as the video from which the clip came. If the video in entirety is not age appropriate, then a clip from the video is not appropriate either.
